

AbdulAfeez Adeyemo

Backend Engineer — Python & NestJS · Fintech, Marketplace & Logistics Systems

Abeokuta, Ogun State, Nigeria · +2348146604258 · adeyemoadebayo603@gmail.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

Backend Engineer with 3+ years of experience architecting high-availability systems for cross-border fintech platforms, regional super-apps, and multi-vendor marketplaces. Proven ability to operate autonomously, including sole end-to-end ownership of backend architecture for a live P2P marketplace and managing production cloud infrastructure. Specializes in Python and NodeJS, with deep expertise in fault-tolerant transaction processing, API design, and building secure, scalable infrastructure for money-movement workflows

EXPERIENCE

Note: Kormart, Instaflow, and Roppi were held concurrently as parallel contract/full-time engagements.

Contract Backend Engineer (NestJS) | Kormart

Oct 2025 – Apr 2026 · Contract · Remote · Concurrent · Nigerian P2P marketplace for distressed sales, disputes, and seller storefronts

- Sole backend engineer for a live P2P marketplace—owned architecture, API design, and delivery end-to-end with no other backend hire on the team
- Designed and shipped RESTful APIs for the full transactional lifecycle: payments, dispute resolution, and order state management
- Integrated third-party payment and logistics services to enable end-to-end transaction processing and automated fulfilment
- Improved system reliability through structured error handling, validation, and performance optimization

Contract Python Backend Developer | Instaflow

Oct 2024 – Feb 2026 · Contract · Remote · Concurrent · Canadian cross-border fintech for CAD–NGN transfers and bill payments

- Built and maintained backend systems powering CAD–NGN cross-border transfers, processing over CAD \$25M in transaction volume
- Designed KYC verification and account-operation APIs balancing regulatory compliance with a low-friction onboarding flow
- Deployed and managed production infrastructure on DigitalOcean (Nginx, database services), achieving 90% uptime across the contract period
- Hardened platform security via SSH hardening, firewall configuration, and SSL/TLS management

Backend Engineer | Roppi

Jun 2024 – Nov 2025 · Full-Time · Remote · Concurrent · Nigerian super app for delivery, food ordering, parcel courier, and commerce

- Built and maintained NestJS services powering four product lines (delivery, food ordering, parcel courier, in-app commerce) serving over 4000 active users across 5 states in Nigeria
- Designed and documented RESTful API routes for order processing and payment integration, used by both consumer and business-facing apps
- Partnered directly with frontend engineers to shape API contracts around product and UX requirements, shortening feature turnaround time
- Profiled and optimised database queries and service logic to reduce response latency under load

Contract Python Backend Developer | Yayako

Apr 2024 – Aug 2024 · Contract · Remote · Nigerian multi-vendor e-commerce marketplace

- Built backend systems for a multi-vendor marketplace supporting product listings, order management, and customer operations
- Designed APIs enabling seamless integration for both web and mobile clients
- Integrated third-party logistics providers for automated fulfilment and real-time shipment tracking

Contract Python Backend Developer | Mzienet Systems

Nov 2023 – Apr 2024 · Contract · Remote

- Developed backend services and API integrations for client web applications alongside a distributed engineering team
- Delivered reliable backend features on schedule across multiple release cycles

Software Development Intern | CodeDay Labs

Jun 2023 – Aug 2023 · Internship · Remote

- Contributed to a retro-style game console in C++ using the Windows API, implementing graphics primitives, texture rendering, and font systems
- Gained hands-on experience with low-level memory management inside a large, pre-existing codebase

PROJECTS

Drova — Multi-Tenant Delivery Infrastructure Platform (Personal Project)

- Architected a multi-tenant platform letting local logistics businesses manage riders, orders, payments, and customer interactions from one system
- Built a WhatsApp-based order intake flow powered by an LLM-driven conversational agent for natural customer interactions
- Implemented dynamic pricing and geolocation-based rider matching using a database-first proximity search approach
- Applied idempotent, fault-tolerant design patterns to guarantee reliable order processing under concurrent load
- Modelled a scalable multi-tenant data architecture in PostgreSQL supporting real-time tracking and shareable business storefronts

RegTraka — Facial Recognition Attendance System (Final Year Project, FUNAAB)

- Built an automated attendance system processing real-time camera feeds with OpenCV-based facial recognition
- Developed backend services with Django REST Framework, PostgreSQL, and JWT-based authentication

SignMeIn — Attendance Tracking Web App · School Management System

- SignMeIn: team-built attendance tracking web app using Django and PostgreSQL (Kibo School of Technology)
- School Management System: built a school administration app using Flask and SQLite

EDUCATION

Higher Diploma in Computer Science

Woolf University – Kibo School of Technology · Oct 2022 – Jun 2024 · New York (Remote)

B.Eng. Mechatronics Engineering

Federal University of Agriculture, Abeokuta (FUNAAB) · Sep 2017 – Nov 2023 (full-time overlap with Higher Diploma) · Ogun State, Nigeria

TECHNICAL SKILLS

- Languages: Python, JavaScript, TypeScript, C++, C, C#
- Frameworks: FastAPI, Django REST Framework, Flask, NestJS, ExpressJS, Starlette, .NET
- Databases: PostgreSQL, MongoDB, MySQL, Redis, SQLite
- Tools & Infra: Docker, Nginx, DigitalOcean, Linux (Ubuntu), Git & GitHub, CI/CD
- Systems & Concepts: REST API Design, Distributed Systems, System Design, Background Jobs (Celery), Pub/Sub, MQTT, Message Queues (RabbitMQ), WebSockets, Unit Testing, Web Scraping

LANGUAGES & INTERESTS

- Languages: English (Advanced) · Yoruba (Advanced) · Arabic (Basic)
- Interests: Football · Travelling · Exploring diverse foods and cultures · Video Games · Reading
